# eTrust™ EZ Antivirus

## Features, Functions, Benefits

Feature	Function	Benefit
<b>Improved User Interface</b>	New! Focused on simplicity and superior ease-of-use, we have designed new buttons, application icons, and Windows-style menus.	Allows easy access to features and functions, assisting you in setting preferences and maintaining a virus-free PC.
<b>Developed and Supported by the worldwide CA Security Advisory Team</b>	Worldwide, around the clock labs detect and remove virus threats before they can damage your PC. Leverages the same technology that develops and supports software for the world's most demanding clients.	Ensures that your PC is protected from the latest threats.
<b>Low Overhead</b>	eTrust EZ Antivirus has a small and compact footprint, with a total install of only 10 MB.	The small install and low usage of system resources provides better compatibility with other applications, and allows for quick scans and downloads of virus updates.
<b>Advanced Help System</b>	New! Help tools available off-line, including integrated error messages, links from the software into the product help, as well as a troubleshooting tool.	Allows easy access to help, allowing you to diagnose problems and utilize found resolutions.
<b>Flashing System-Tray Icon</b>	Flashing System-Tray Icon alerts you to critical errors and other important information.	Alerts you to errors so that updates are not missed without notice. Easy one-step click through to review the error log or message.
<b>Built-In Support Reporting Tool</b>	Reporting tool allows you to send information to CA Support that may be critical to fixing a virus-related problem on your PC.	Saves time "back-and-forth" with Support by allowing you to answer all questions with one report.
<b>Password Protected Program Options</b>	Allows you to create a password to protect eTrust EZ Antivirus options, so changes cannot be made by unauthorized users.	Reduces the risk of unauthorized access, which can lead to a virus attack.
<b>Scheduled and On-Demand Scanning</b>	Allows you to run a scan at any time, or schedule scans to occur at pre-selected intervals and times.	More convenient, less PC downtime
<b>Automatic Email Scanning</b>	Automatically scans inbound email and email attachments for all POP3 email clients, including Microsoft Outlook, Outlook Express, Netscape Mail, Eudora, Pegasus and others.	Provides protection against viruses that arrive via email, rather than waiting for the virus to be detected as it executes.
<b>Real-time Scanning</b>	Scans files when they are opened, closed or saved to your computer.	Proactive protection stops viruses from entering your computer in real-time.
<b>Archive Scanning</b>	Scanning for compressed	Enhanced scanning to protect

# eTrust™ EZ Antivirus

## Features, Functions, Benefits

	archives will scan for viruses in files ending in the following extensions: arj, bzip2, cab (MSZIP and LZX), CA Zip, gzip, jar, lha, MS compress, rar, tnef, unix compress, zip and mail files: MIME, uuencode, binhex.	your PC from resident viruses in compressed files.
<b>Heuristic Scanning</b>	Stops new and unknown viruses even before they are detected by signature files.	Preventative protection to detect newly discovered viruses.
<b>File Scanning Exclusion List</b>	File Exclusion List allows you to exclude specific files and folders from scans.	For the advanced user who would like to keep their compressed files from being scanned.
<b>File Quarantine</b>	New! Removes malware from its current location to a secure quarantine area.	Allows you to further review the file detected as a virus, and research more information about the specific threat.
<b>Interactive Virus Detection Messages</b>	When real-time scanning detects a virus, a pop-up message provides a link to the CA Virus Information Center entry for the specific virus found.	Provides you with essential information about the specific threat found.
<b>Fully Automatic Signature Updates</b>	Configured to automatically update your virus signature files every 24 hours.	Easily and effectively addresses the #1 reason PC users suffer virus attacks: out-of-date signature files.
<b>SMART AutoDownload</b>	AutoDownload detects exactly which viruses you are protected against, and allows it to update your PC only with the necessary signature files, providing a smaller download.	Reduced signature download size allows for quicker updates for a more positive user experience.
<b>ICSA Certification</b>	The most widely recognized organization for testing and certifying antivirus software is the International Computer Security Association (ICSA). To be certified by the ICSA, the software must detect 100% of viruses "in the wild" (in general distribution), and at least 90% of the more than 6,000 test viruses.	All versions of eTrust EZ Antivirus are ICSA-certified, providing third party qualification of an already leading software product.
